

Increase efficiency of manufacturing warehouse with WMS360 solution

Mar 28, 2019

Seldat Technology Services organizes a webinar (online workshop) at 10 am on April 11, 2019 to help businesses manage warehouses more effectively as well as keep up-to-date with trends of using IoT technology and warehouse automation.

- How to improve warehouse performance?
- How to get products inventory report in less than 1 minute?
- How to manage import and export goods and monitor the workload of warehouse executives?
- How to pick products quickly?
- What trends of IoT technology are currently used in warehouse management and warehouse automation?
- Which enterprises have successfully deployed WMS360 in Vietnam?

Seldat Technology Services will host the webinar (online workshop) at 10 am on April 11,

2019 to help businesses answer all of these questions.

With the desire to provide useful information and answer all participants' questions and concerns, we open for 40 registers with first come, first served. Sign up now to attend the event.
