

# Highlights of Eurocham event "Moving forward in Supply Chain Technology"

Mar 29, 2019

Chacko Verghese, Senior Vice President and Global CTO represented Seldat Tech and was the sole speaker for a business luncheon organized by Eurocham Vietnam.

Chacko Verghese, Senior Vice President and Global CTO represented Seldat Tech and was the sole speaker for a business luncheon organized by Eurocham Vietnam.

The European Chamber of Commerce in Vietnam, better known as EuroCham, is one the principle voices of the business community in Vietnam. The chamber was established in 1998 to help develop Vietnam into an attractive investment destination and trading partner for European business.

Chacko covered the latest technologies in the logistics process and featured multiple case studies that have been successful. The focus was how these technologies and case

studies could be applied in Vietnam. Many of the topics he covered included AI, robotics, machine learning, big data, and how they are tailored for logistics and the supply chain.
